Netsounder Cable

CLEAR CONNECTION

***Our steel and polyethylene
sounder cable is entirely
manufactured in the U.S.A.
Price competitive and quality
superior. Specify reliable
Ocean Systems for your net
sounder cable***

STEEL-JACKETED CABLE

With a standard break strength rating of 16,000 pounds, our 11-MMSA double-armor net sounder cable withstands tension from heavy work loads. Steel armor construction resists abuse and rough handling associated with heavy usage. The center coax cable keeps electrical attenuation to a minimum. A water-blocked flexible return shield provides optimum protection from moisture.

POLYETHYLENE-JACKETED CABLE

A specially formulated polyethylene jacket protects our 12-MMSJ cable in harsh operating conditions. A water-blocked, Braided shield reduces "wicking". The 37-strand, steel-center conductor carries 1000 working volts. Break strength is rated at 3,500 pounds. Spliceable construction makes repair quick and easy.
